

The Best New Fishing Gear

By Mark Corke

The editors of *BoatUS Magazine* scoured a football-sized tent at the 2017 Miami International Boat Show to find the year's most interesting new fishing gear.

On the Edge

Most fishing boats have a variety of knives on board, but here's one that's designed with safety in mind — your safety. The Cuda 1-1/2 inch safety knife is designed to cut things like mono in a hurry. Shaped like a small anchor, Cuda has no sharp edge on the external parts of the hook so you're unlikely to cut yourself accidentally. The

knife is housed in a handy silicone sheath, which clips handily to a belt or life jacket so it's close to hand in an emergency. \$22.99 |
